

Get important health screenings at home

We're making it easy and convenient to complete preventive health screenings. If you are eligible, there is no cost to you and you can complete them from home.

Getting preventive health screenings is an important part of maintaining good health. They help identify issues early before they become serious health problems. But we know life can get busy, making it difficult to stay on top of your care. That's why we're working with Labcorp to offer several at-home screening kits for eligible members:

Colorectal screening

For members ages 45 – 75, excluding those in hospice or with advanced illness

Kidney health screening

For members ages 18 – 85, excluding those who have advanced kidney disease (ESRD), in dialysis, in hospice, or with advanced illness

A1C testing

For members ages 18 – 75 with either Type 1 or Type 2 diabetes

Here's how it works:

Order your screening kit(s)

It only takes a couple of minutes to sign up with Labcorp and order the screening kit(s) you're eligible for.

Complete the sample collection

Follow the instructions provided in your at-home screening kit(s) and return your lab sample to Labcorp using the prepaid packaging provided.

Get your results

Labcorp will provide your test results within a few days through their secure online portal. If you have an abnormal test result, a clinical team member from Labcorp will also contact you.

Labcorp Holdings, Inc. (Labcorp) is an independent company.

Independence Blue Cross offers products through its subsidiaries Independence Assurance Company, Independence Hospital Indemnity Plan, Keystone Health Plan East, and QCC Insurance Company — independent licensees of the Blue Cross and Blue Shield Association.
